BLOOD DISEASES CONTAGIOUS TROUBLES

Contagious Blood Poison more thoroughly permeates the system than any other disease. Its infectious virus contaminates every corpuscle and tissue of the circulation, and for this reason its symptoms are of a varied nature. When it enters the blood it is but a short time until the mouth and throat begin to ulcerate, the skin becomes spotted, rashes and eruptions appear on the body, sores and ulcers break out, the hair falls, and frequently nails on hands and feet thicken and come off. Mineral medicines which simply shut the poison up in the system should be avoided, for when such treatment is left off the old disease will break out again, often worse than before. S. S. S. cures Contagious Blood Poison permanently, and it does so because it thoroughly purifies the blood. S. S. S. goes into the circulation, and drives out the last trace of the destructive germs, adds richness and vigor to the circulation and allows it to nourish the diseased portions of the body back to health. S. S. S. is purely vegetable, being made entirely of roots, herbs and barks, without a particle of mineral, and its vegetable ingredients always hasten the cure by toning up the stomach and digestive members. Home Treatment Book and any medical advice free to all who write.

WATCH SAVES MAN FROM FATAL INJURY

Sends the Timepiece to Las Cruces After Being Kicked by Horse.

Las Cruces, N. M., Sept. 21.—The Broadview Jewelry company yesterday received from James Hiller a silver timepiece which probably saved its owner from perhaps fatal injuries. Hiller, who is employed on the Pitchfork ranch near Hillsboro, was out for several days on a horseback trip over the country from Hillsboro to Arizona. The latter part of last week, close to the Arizona line, he was kicked by one of his horses, but the kick landed on a large silver watch which he carried in his shirt pocket, with the result that one rib was broken and his body severely bruised.

He came into the ranch Sunday and immediately sent the timepiece here to be repaired, the case being badly battered and the works damaged. It was a lucky chance that he was carrying the watch just where it was or he would have suffered injuries, which, from the fact that he was many miles from a town or a doctor, might have proved fatal.
